

**KEEP  
COOL... mobil**

# Climate Researcher

## You are a Climate Researcher

It is your job to provide the latest results of climate change research to worlds' decision makers!

You inform the mayors about the **current status of global warming** and you observe the **path of economic development of the cities** in the game.

Some guiding questions:

- **How does the global mean temperature change?**
- **What's the number of black factories (globally) and how does it change?**
- **What's the number of green factories (globally) and how does it change?**
- **When do the mayors invest in adaptation to climate change?**

**You can ask the players before the start of the game which data should be collected.**

Visualize your results on a FlipChart or in PowerPoint

## Some hints...

Use the world map to visit the screens of the different cities.

Use statistics from the games' menu

## Material

- Tablet bzw. Smartphone bzw. PC
- FlipChart with prepared coordinate system for a diagram
- FlipChart-Markers
